- 

## PROJECTS

---

### 1.Live- Project:- Fishery Project (Ritz Consultancy)

**Operating System:** Windows

**Tools & Technologies:** React, Javascript, Html, Css, Rest API,EmailJs,Git, Visual Studio code.

**Project-Link:** [website](#)

#### Project Description:

This Fishery Project is a comprehensive web application built from scratch using React, designed to offer consultancy services and marketing solutions for fish seeds and fish food. The platform connects fish farmers with suppliers and experts, streamlining access to high-quality fish farming products and professional guidance.

#### Roles and Responsibility:

##### Responsive UI Development

- Build and maintain a responsive user interface using React to ensure seamless performance across desktops, tablets, and mobile devices.

##### Google Maps Integration

- Implement Google Maps API to provide location-based services, helping users find suppliers, farms, and consultancy services easily.

### UI/UX Collaboration

- Work closely with UI/UX designers to transform wireframes and prototypes into functional, visually appealing components.

### Performance Optimization

- Optimize frontend performance for faster load times and smooth interactions, ensuring a high-quality user experience.

### Cross-Browser Compatibility

- Ensure consistent design and functionality across all major browsers and devices.

### Design Consistency

- Maintain consistent visual styles, color schemes, and typography throughout the platform for a professional and cohesive look.
